Announcements

There was agreement that the additional statement should be added to the syllabus template with a change so it now reads:

“Disrespectful behavior or comments directed toward any group or individual will be addressed by the instructor or referred to the Dean of Students.”

Dan Klingenberg to attend a NSF-sponsored workshop which will discuss high school engineering and college credit. If you have any comments, please pass on to Dan.

Course Proposals (to view in Lumen, copy & paste URL)

ECE Requisite Amnesty Review

Motion to approve the ECE requisite amnesty spreadsheet as presented passed unanimously.

(Pre) Requisite Process

A process will need to be developed to document those students who receive permission to not fulfill enforced requisites. These approvals are currently communicated through email, but better documentation is needed, especially to address ABET concerns.

Physics 201-202 Requisites

Physics would like to add the following requisites for:

Physics 201: Math 221

Physics 202: Physics 201 OR Physics 207 OR EMA 201

APCRC okay with these requisites, although EP may need to adjust their course sequences.

Sustainability Course Attribute Policy

Although the APCRC is not opposed to the attribute, they are concerned that this request will open the door for additional attribute requests. Also, since the attribute doesn't distinguish the different areas that address sustainability, they question the benefits/usefulness of the attribute. Dan to relay comments to APIR.
